home and hence far from those who know them best and who would more readily contribute comforts. Such a clime there is scant hope of cheerful practice is condemned by the medical surroundings among strangers. profession of today. Osler, an authority on tuberculosis

says: "Geographical position has very a person is usually a financial as well little influence. The disease is perhaps as a physical wreck. To send such a more prevalent in the temperate regions than in the tropics, but altitude is a more potent factor than latitude; in the high regions of the Alps and Andes and in the central plateau of Mexico the death rate from tuberculosis is very low."

The most important factor in the cure of any malady is care which broadly considered is proper treatment. The proper treatment of tuberculosis means not only the constant regular care of the patient by a physician but it means all the other care that the nurse and anxious friends and relatives ful force in the production and mainshould give. Besides the proper drug tenance of tuberculosis.

treatment is instituted.

Double Action Waterfall. There are a good many salt water cataracts in existence. They may be found in Norway, southern Chile and British Columbia, where narrow flords, or arms of the sea, are obstructed by barriers of rock. The rising tide flows over the filters through such reefs into the great natural reservoirs beyond, but the water is held back at the ebb until it breaks over the obstruction in wings then the journey is not begun in an irresistible torrent. Most curious any circumstances. The next day the Kenyah tries once more until the hawk of all is the waterfall at Canoe pasgives the sign which he wants. Thus sage, where the island of Vancouver land. Here the floodtide from the gulf of Georgia to the scuthward is held birds are of greater importance than back at a narrow cleft between two others, and also to the singing of the islands until it pours over in a boiling cascade eighteen feet high with perhaps double the volume of the Rhine. At the turn of the tide, however, the waters from the north rush back into the gulf, producing a cascade of equal height and volume. The waterfall ac-

Wet Weather and Camels.

Camels are very sensitive to moisture. In the region of tropical rains they are usually absent, and if they come into such with caravans the results of the rainy season are greatly feared. The great humidity of the air explains the absence of the camel from the northern slopes of the Atlas and from well wooded Abyssinia. This sensitiveness expresses itself in the character of different races. The finest, most noble looking camels, with short silklike hair, are found in the interior of deserts, as in the Tuareg region in north Africa, and they cannot be used for journeys to moist regions. Even in Fezzan, south of Tripoli, the animals are shorter and fatter, with long coarse hair, and in Nile lands and on coasts it is the same. These animals, too, are less serviceable as regards speed and endurance.

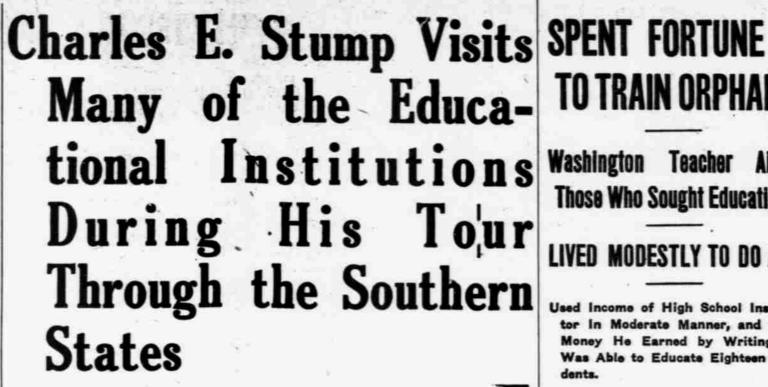

ter, in London, in 1721, led to a most British Red Tape. An English officer who had been, dangerous disturbance, only quelled by through mistake, reported "killed in calling out the military. In October, action," on his return from the front 1747, a Drury Lane playbill had the went to his bank to cash one of his following appended notice: "As the adchecks. The clerk at the counter, inmittance of persons behind the scenes stead of asking the welcome question, has occasioned a general complaint, on account of the frequent interruption in "How will you take it?" looked doubtthe performance, it is hoped that genful and puzzled, stared at the soldier tlemen won't be offended that no monand finally hurried away to seek advice elsewhere. He presently returned ey will be taken there for the future." with the news that the check could not be cashed. "But you know me, and that is my signature!" exclaimed the "Why do you object to my marrying astonished officer. "M-yes," said the clerk hesitatingly, "but the fact is, sir, "Because you can't support her in that you're-you're dead, you see, and the style to which she has been accus-I'm told we shall require you to give "How do you know I can't? The offices are filled with business men and professional men. It is a place where men could go with safety and see the world. Reaching the building I met a little man, C. C. Shanks.

> Perhaps you will want to know who this little man Shanks is, for I wanted to know myself. He was about like the man who wanted to see Jesus on that occasion and got way up in a tree. He is auditor of the Atlanta Mutual Insurance Association. It is one of the companies in the south that is doing work like the Metropolitan and other white companies out West. I went in his office and saw so many clerks, I could hardly keep from shouting. His company has just been admitted to do business in Arkansas, and Mr. Shanks was busy getting the man off for to establish agencies and offices. A. F. Herndon is president and T. K. Gibson secretary. They are doing business in Kentucky, Tennessee and Missouri. But I must not take up all the time to talk about it.

I met one polite, courteous young woman, who wrote my letters for me. It was Miss Minnie Mae Cloud, who works in the afternoon and goes to school in the morning. She is smart. Then on to another part of the world. This time I went to see Morehouse college. Prof. John Hope is president of this school. He has some real college, and you can see the college spirit proof to the contrary before we can there. I have never seen such a fine set of young men. President Hope is of course, one of us and his wife is from Chicago. She is the sister to Adolph Burns up there in Chicago, but then she has an individuality of her own, and one worth while. She is a scholar and a wife and a mother.

> I took up some time walking around shaking hands with them professors. Dean Brawley, Prof. Archer, and Prof. this and Prof. that. They are all live wires, and I want to congratulate some body on getting together so much

Then to see Morris Brown University, was the next thing. This is the school of the African Methodist Episcopal church. It has grown and grown "Oh, yes!" replied Miss Cayenne. "If we are doing for our own education

Jacksonville, Fla.-If you have never | about making him a bishop. This will been educated, it is certainly an easy take place in May in Philadelphia, and thing to get one in this country, be- he has won the place, by training and cause there are so many schools, and by hard work. I enjoyed meeting the I have been to lots of them until I men and women who were teachers feel that I am one of the most edu- here. They are way up stairs, believe

> There are three other schools in the city, Atlanta University, Clark University, Spealman Seminary for girls; and now there is also Gallon Theological Seminary, where preachers are trained to tote the word. Some strong men have been turned out from this

Up to Newman, Ga., was my next stop, and I am glad that I had the pleasure of going there. Dr. Mc-Whorter, met me at the stable in his auto, and toted me to his house for breakfast, and then to visit the schools. McClelland Academy impressed me very much. It is a Presbyterian connection school, but it is opened for all. At the head of the school is Rev. F. Gregg, A. M., a fine scholar and associated with him are Rev. S. J. Ellis, Prof. F. D. Hooks, Mrs. L. A. Gregg, Misses A. J. Evans, N. W. Kelsey and W. B. Sliger. They are doing good

From Newman back to Atlanta, then Of course you know I did not re- on to this place. I am here looking main in Macon, but moved along going at Prof. N. W. Collier and his great to Atlanta, Ga., which is the place work being done at the Florida Bapwhere all the laws are made for the tist college. This young man is a mostate, and where we are doing some del school man and he is making things business, and don't you forget it. It happen. He is one of the best young is a place where our people are doing men I have met in any school. He some business too. It is nice to go to stands for work, real work and plenty

I had the pleasure of meeting Miss Sarah Blocker of the Academy. She has devoted her life to this work, and it is almost impossible to see anything A visit to the Odd Fellow's building that looks like a black hair about her head, and all have gone in the cause of lifting up her people. She has won her crown of glory, and I am sure the Lord will give it to her when she goes to heaven. Such women should be free from personal care. Hundreds of girls have been helped by this wonderful character. She is a woman of worth and ability. I would mention Prof. Grimes and others.

> But it has not all been Sunday school work with my getting around this time. I have been riding in first-class cars. I have decided not to ride in Jim Crow cars any more. I do not care what the condition of it is, when I get in it I make it first-class, because I am riding. I was in one of these specials. A whole one, with a small smoking room. There were only 6 of us folks, and in the rear end was a long seat. It was long enough for me to stretch out, so I took it. It was on the Southern. Shortly after I was seated a man came in and told me to sit up

I turned right red in the face at this and asked him why.

He told me that we had plenty room and some white gentlemen wanted to sit back here. The devil jumped in me as big as the engine which was to pull that carriage, and I told him in plain English that they had no business in there, and I was not going to get arrested by riding with them. It was strictly against the law of Georgia, and I was a law-abiding citizen of the commonwealth of the world. He then said the conductor wanted to sit there. I told him the conductor had from that iron horse back to the end of the car and I had only that one car, and would not move for the conductor.

"I don't want to see you insulted," he added, "and this is what the conductor will do."

"Then he will have to report to the authorities high up for doing so. I am some pumpkins myself, and important at that. I want to have you get yourself right out of here, and if you don't the angel will soon be acquainted with you white man, or them imps. I don't know where you have made up your mind to spend eternity, but if you intrude on us any longer you will have until it is one of the largest institu- to go whether you have made up your tions in the south. It shows just what mind or not." He got out in a hurry.

TO TRAIN ORPHANS

Washington Teacher Aided Those Who Sought Education.

LIVED MODESTLY TO DO ACT

Used Income of High School Instructor In Moderate Manner, and With Money He Earned by Writing He Was Able to Educate Eighteen Stu-

Everett, Wash.-F. D. Mack, teacher in the Central school, has spent about \$40,000 in educating eighteen students, seventeen boys and one girl, during the last sixteen years, according to a story he reluctantly told a newspaper repre-

Living on his school salary in a modest way both in Minnesota, his former home, and in Washington, he has earned the money to send students through universities by writing short stories and magazine articles. He has paid out between \$2,000 and \$3,000 on each of his "children."

Some of the youngsters were orphans, and some had one parent, but all were eager to learn and were handicapped by lack of money.

The thirteen boys who are alive are all actively engaged in the professions in which Mr. Mack has educated them. Two are druggists, one being in St. Paul and the other in Los Angeles. Two are instructors in the University of Minnesota, where they were graduated. One teaches mathematics, and the other is an instructor in German. This latter young man plans to be a

physician and in 1914 married a girl who wished to go to Germany to get her master's degree, so he and his bride sailed for Germany to continue their studies, only to be turned back by the beginning of the war.

Mr. Mack sent him through Normal school, the University of Minnesota and Harvard, where he received his master's degree.

A young man who chose to be a broker received his education at the University of Illinois. He started out to be an architect, but changed his mind and took a commercial course. He was graduated four years ago and is now in Minneapolis engaged in the lumber brokerage business. He is the best money maker of the "family." In less, spoiled child of heredity, but pruhis four years out of college he has made \$40,000.

A mining engineer who was educated at the University of Minnesota is now working in a mine at Butte, Mont. The banker received a thorough commercial education, and then Mr. Mack set him up in business in a bank in Elgin, N. D. Mr. Mack says that if any of his boys wants to start in business he always gives them enough money to begin. He recently bought an eighty acre farm for one of them.

A dentist lives in Chicago. He had four years at the University of Valparaiso. Mr. Mack says this boy married a rich nurse.

One boy who studied to be a lawyer lost his health after his graduation from the University of Minnesota law school, so could not practice, and is now employed as chief of the Minnesota state fish and game commission, with headquarters at St. Paul.

Self educated and quiet, Mr. Mack would not be thought responsible for one of the most unusual philanthropies in the world.

NO PAINTER'S COLIC FOR HIM.

Bill For "Tint" Makes Bachelor Issue Leap Year Declaration.

Elwood, N. J.-Robert W. Hunt, a retired college instructor, received a letter recently from a neighboring town containing a bill for 40 cents for "tint" purchased by "Mrs. Hunt." Hunt is a good looking bachelor with a steady income, and the inquisitive element of Elwood at once interpreted the postoffice bulletin in terms of leap year possibilities. To quiet the buzzing gossip, Hunt

has issued the following statement:

"We have had several offers of marriage, and one or two ladies have assumed we were engaged without making any offer, and it is with fear and trembling we pass each day of this year, which is divisible by four. However, when Mrs. Hunt does arrive she shall come as nature painted her, with eyes like the heavens, with cheeks like the rose and with lips like the damp of crushed strawberry. She shall have no need of 'tint.' When we want a kiss we don't propose to mess through two or three coats of paint to get it."

Dogs Tree Insane Man.

Oregon City, Ore.-Peter Brevio, aged forty-three, an Italian, was treed with the aid of bloodhounds arrested and brought back to Oregon City and committed to the State Hospital For the Insane. Brevio lived in a hollow tree, and his diet consisted of roots, berries and what food he could find around neighboring farmhouses. He stole an ax from a farmhouse and passed much of his time chopping lown trees. A number of men of the district determined to arrest Brevio and went to his tree home. The Italian chamber; strong here, a man is strong ran away. Dogs were then put on his everywhere. - Saigo.

Jane Wenham was indicted at the Hertfordshire assizes on March 4, 1712.

for "conversing with the devil in the form of a cat," under the provisions of the act of 1604, repealed in 1736. Her prosecutors wished to have her also indicted for practicing witchcraft to the harm of Ann Thorn, a servant girl sixteen years old, but this was not allowed, although evidence was produced at the trial to show what injury had been done the victim by means of crooked pins and by placing cakes and cats' hair in Ann Thorn's pillow and how the prisoner had caused the death of some cattle simply by walking through a turnip field.

The jury brought her in "guilty," and Justice Powell passed sentence of death, but took steps to quash the verdict. Wenham's prosecutors published an account of the case, but their arguments were pulverized by scientific men. Jane Wenham herself was liberated and taken under the protection of Colonel Plummer, who gave her a cottage, and we are told by Dr. Hutchinson that in 1720 the whole country was fully convinced of her innocence.-London Spectator.

The Game of Life.

Life becomes, as the stoics more than once tell us, like a play which is acted or a game played with counters. Viewed from the outside, these counters are valueless, but to those engaged in the game their importance is paramount. What really and ultimately matters is that the game shall be played as it should be played. God, the eternal dramatist, has cast you for some part in his drama and hands you the role. It may turn out that you are cast for a triumphant king. It may be for a slave who dies of torture. What does that matter to the good actor? He can play either part. His only business is to accept the role given him and to perform it well. . . . Success or failure is a thing he can determine without stirring a hand. It hardly interests him. What interests him is that one thing which he cannot determine-the action of your free and conscious will.-Gilbert Murray.

Kings and Shaving.

The classic case of a king who knew better than to let anybody else shave him is that of Dionysius the elder, tyrant of Syracuse, who appears to have been unable to shave himself, for he is said to have resorted to the uncomfortable device of singeing off his beard with hot walnut shells, says the London Chronicle. We may suspect that Napoleon's was another case of the kind. Rogers asked Talleyrand whether Napoleon shaved himself. "Yes," replied Talleyrand; "one born to be a king has some one to shave him. but they who acquire kingdoms shave themselves." That way of putting it pleasantly emphasizes the practical superiority of the parvenu to the helpdence probably entered into the matter also, if Taileyrand's statement was

A Queer Fish.

A male fish which hatches the young of its mate is the Chromis paterfamilias. It is found in the lake of Tiberias, Palestine. Strange to say, this industrious fish hatches its young in its mouth. When the female has spawned in the sand the male approaches and draws the eggs into his gills, where they remain until hatched, when they struggle out of their confinement into the parent's mouth. As many as 200 perfect young are sometimes found in the mouth of an adult male. How the fish manages to feed itself without swallowing its young is a mystery. The grown fish is about seven inches long and one and three-quarters wide. Its back is olive green, shot with blue, and the belly is silver white, marked with green and blue.

Reason For Complaint.

"I keep the best bread," said a certain baker the other day to a poor fellow who complained of the inferior quality of the article he had purchased of him the day before.

"I do not doubt it," replied the cus-

"Then why do you complain?" asked

"Because I would suggest that you sell the best bread and keep the bad," was the reply.-Pittsburgh Telegraph.

Some Evidence.

"You say that preparation will make the hair grow?" asked the thin haired man of the druggist.

"Why, say," came from the drug man, "I know a customer who took the cork out of a bottle of that stuff with his teeth, and now he's got a hairlip."-Yonkers Statesman.

Part Often Overlooked. "It is all right to pat yourself on the back occasionally," said the dis-

penser of sage advice. "Yes?" said the player up. "But don't forget to call yourself

down when you need it, my boy."-Pittsburgh Post. Treat For the Boarders.

"Ma," queried the small daughter of the boarding housekeeper, "what shall I do with these basting threads?" "Give them to me and I will stir them into the frosting for the cocoanut

cake," said her mother .- Youth's Companion.

Lively Cheese.

John-I'll bring you a fork, sir. The Customer-What for? John-The camembert, sir. The Customer-A fork's no good. Bring a revolver.-Exchange.
